Accenture Student Empowerment Program – Sophomore

Bring your big ideas and ability to creatively solve client business problems to Accenture and you may find that your career catapults to places you never imagined. Accenture is a global management consulting, technology services and outsourcing company and we’ve created the Accenture Student Empowerment Program (ASEP) to help students like you jump start your career.

Upon acceptance into the program, you’ll benefit from a mentorship program that is built to help you learn more about consulting and better define your interests, goals and career path. Learn from experienced professionals who’ve traveled the road you may want to take and get a true glimpse into the day in the life of a consultant. If you are energized by what you see, take the next step to see if you’re eligible for a paid summer internship.

Accenture Student Empowerment Program Highlights
If you want to learn first-hand how our consultants help transform some of the top brands in the world and why clients consider them trusted advisors, you need to be part of the Accenture Student Empowerment Program. As an ASEP fellow, you’ll:

• Develop a relationship with your mentor
• Gain exciting exposure to the business world
• Understand the relevance of your academic studies
• Develop a professional network and practice your networking skills
• Understand what companies are looking for with new hires
• Potentially have the opportunity to intern with Accenture

Internship Responsibilities: Accenture Student Empowerment Program – Sophomore
Accenture recruits for entry level internships in Technology, Strategy, Digital, and our Operating Groups for technology and management consulting. If eligible, you’ll be aligned with a group based on your experience, interest and business demand.

There will never be a typical day at Accenture, but that’s why people love it here. The opportunities to make a difference within interesting client initiatives are unlimited in the ever-changing business landscape. Here are just a few of your responsibilities.

• Analyze and document current business processes and technologies
• Design and test new business processes, capabilities, and technologies
• Build portions of the application
• Develop innovative answers to complex business and/or IT challenges
• Focus on technical architecture, delivery excellence, program management and specialist technology areas
• Build a common set of technology capabilities, across assessment, planning, design and implementation
• Support functional user requirements and specifications
• Develop communications, training and job aids to assist in change management activities
• Perform rigorous financial, business case, statistical and other quantitative analyses

Paid internships last 10 to 12 weeks and typically begin in late-May/early-June and end in mid-August /early-September.
